DETAILED ACTION

Remark

1. Claims 10 and 12 have been previously cancelled, and claims 1-9, 11, and 13-22 are pending for reconsideration.

Allowable Subject Matter

2. Claims 1-9, 11, and 13-22 have been allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior arts of record to Shoff, Klosterman and Schein fails to either alone or combine to teach or suggest an information handling system and/or a computerized system for integrating internet sources into an electronic program database, wherein a graphical user interface configured to ***display at least one television channel and at least one scheduled internet channel concurrently, and wherein the at least one scheduled internet channel has at least one event with a scheduled start time and a scheduled end time***, together with other features of adding and/or removing the television channel and the internet channel. Klosterman shows a similar feature of displaying the interface that the user can access the Internet, refer to Figs. 6a & 6b; however, they are supplemental information related to the current television channel, with the website linking, but not the scheduled internet channel with a scheduled start time and a scheduled end time, which indicates the internet channel is a separate identity from the television channel and concurrently displaying in the program guide of the graphical user interface, as particularly pointed out in claims 1, 6, and similarly in claims 15, 17 and 19-22.
